line on Figure 1 with its proper elevation (hint: contours are generally drawn at values divisible by 5 or 10; note the contour interval is 20 ft.)

Environmental Geology,

Topographic Map Lab

A topographic map is a useful type of map that adds a third dimension (vertical) to an otherwise two-dimensional map defined by the north, south, east, and west compass directions. This third dimension on a topographic map is represented by contour lines, which are imaginary lines drawn on a map that

represent a constant elevation above either average sea level (a.s.l.) or mean sea level (m.s.l.).

Chapter 7. Topographic Maps
- Introductory Physical ...
This exercise will look at how topographic maps are created, what information they contain, how you can use them with a compass to get where you want to go, and how to measure the relative positions of points of interest. Much of the information discussed is applicable to all types of maps, but for the exercises associated with this tutorial ...

Introduction to Topographic
Maps - ISU Geosciences

For this exercise, if you have not done so already, obtain a 1:24,000 scale map of an area near where you live or where you would like to do field exercises.

Topographic maps can be obtained at your local BLM or Forest Service office, as well as through the U.S. Geological Survey.
